Economic Value and Revenue Management Systems

An Integrated Business Management Model

- **Presents a new approach to the creation of value theory to demonstrate that revenue management and CRM are interdependent**
- **Analyses why and how pricing policies become more dynamic in different sectors**
- **Covers segmentation, differentiation strategies and explains the importance of the stock in a new managerial model**

Filling a gap in existing literature on revenue management systems, this book explores the use of business strategies which are specifically designed to have a positive impact on economic and financial efficiency. Focussing on services within the tourism industry, the author takes a new approach and identifies dynamic pricing and service differentiation as key components of strategic management. Providing fresh insights into an ever-expanding sector, this book will be a useful tool for those studying business strategy and management, as well as value creation theory, as it ultimately presents an integrated business management model which will ensure sustainability.
